Experience

Gymshark

March 2024 - PRESENT

Senior Fullstack Engineer

 <https://gymshark.com>

- Leading architectural design and implementation for Gymshark’s web eCommerce store.
- Spearheading infrastructure improvements, optimizing development processes, and enhancing performance as well as documentation.
- Mentoring and guiding engineering teams to improve code quality and best practices.
- Collaborating with cross-functional teams to drive product innovation and ensure accessibility.

Olympic Channel

August 2021 - February 2024

Senior Fullstack Engineer

 <https://olympics.com>

- Led a team of 8 developing the Olympics.com website to display live Olympic and Olympic-affiliate event results as well as qualifier information and historical games data.
- Sole developer of the company's SSO and authentication platform Olympic ID which serves **3 million monthly recurring users** and **over 200 million monthly users** during the Tokyo 2020 and Beijing 2022 Olympic Games.
- **Managed scrum planning for a team of 8** including alignment meetings, Jira management and task estimation and distribution as well as managing KPIs and burndown.

Pelcro

2020 - 2022

Senior Fullstack Engineer

 <https://pelcro.com>

- Led a team of 3 developing Pelcro's React SDK, enabling seamless subscription management for publishers and content creators on **high-traffic websites** reaching **over 100 million monthly visits**. **Managed a team of 6** including alignment meetings, Jira/Asana management and task distribution and followup as well as managing KPIs.

Synapse Analytics

2019 - 2020

Fullstack Engineer

 <https://synapse-analytics.io>

- Developed the frontend features for Synapse Analytics' Konan AI Credit Decisioning platform for Financial Companies. The application has processed over a million business credit applications.

Projects

Throwaway

 <https://throwaway.raslan.dev>

Developed a browser extension for QA testers and privacy enthusiasts that allows users to generate digital users and access disposable email inboxes as well as use AI to automatically fill relevant fields on website forms. The extension has **over 5000 installs** and hundreds of daily active users including a number of Fortune 500 companies.

Olympic ID

 <https://olympics.com/en/sign-in>

Sole developer of the Olympic ID Single Sign On (SSO) project that manages the onboarding flow of the website as well as user targeted flows and internationalization for 12 languages. The platform includes numerous features from customizable marketing templates, highly accurate analytics and engagement reporting, controllable dynamic themes and subscription management.

Pelcro.js

Authentication and Billing Platform

 <https://github.com/pelcro-inc/react-pelcro-js>

Led development on Pelcro's React Elements platform and JavaScript SDKs that allow businesses to build custom user interfaces for authentication, authorization and billing as well as a **mobile-first, accessible and responsive design system** integrated into the component library.
